Foreword

The Indian Adult Education Association is an apex NGO working in the field of adult education for the last over 75 years. It has been providing academic support to adult education through its programmes and publications. The book, 'Status and Trend of Literacy In India (Adult and Youth) Database for Literacy Programmes – 2011' is in the series of providing support to adult education through database for planning, policy and research in this field. The database which is based on different censuses conducted in the country mainly focuses on progress of literacy during the last decade and on factors which affect literacy scenario at different levels. It analyses the growth of total population of age group 7 and above, adult and youth population and progress of literacy of total population adult and youth population. It also provides data on important demographic indicators like sex ratio, birth rate, death rate, infant mortality rate and fertility rate etc. It also provides an insight in the progress of adult and youth literacy at the international and regional levels and inter-alia brings out literacy situation of the SAARC countries.

Shri Prem Chand, Senior Fellow, International Institute of Adult and Lifelong Education (IIALE) set-up by Indian Adult Education Association and former Senior Consultant of National Literacy Mission Authority has compiled and analyzed the census data for this publication. He has also brought out the impact of adult literacy programmes on the adult literacy situation of the country during the last two decades and has attempted to project the adult literacy situation in 2021. I am grateful to Shri Prem Chand for planning and preparing this publication. I also acknowledge with thanks the support and suggestions given by Dr. V. Mohankumar, Director and Dr. Madan Singh, General Secretary, Indian Adult Education Association.

It has been observed that the estimated contribution of adult literacy programmes in improving the adult literacy situation in the country during the last decade was much less as compared to that of its contribution made during the decade 1991-2001. In view of the magnitude of the problem of adult illiteracy in India, need for stepping-up the contribution of adult literacy programmes in raising the adult literacy rate during the current decade cannot be over emphasized. The projection of adult literacy rate by 2021 through the progression method, which takes into account the impact of formal system of education, suggests that adult literacy rate will reach only 75.5 percent by 2021. To improve this, adult literacy programmes need to do much better during the current decade as further increase in this rate depends on the achievements of adult literacy programmes.

I am sure this database will be extremely useful for educational planners, programme implementing agencies, adult educators and researchers at different levels

Preface

Census of India brings out literacy data for age group 7 and above and also contains literacy data by single year age/quinquennial age groups. Effective literacy rates based on age group 7 and above data are being widely used in India for different purposes. Few countries use 10 years and above data for working-out literacy rates of their country. But UNESCO brings out comparative adult and youth literacy rates for different countries of the world which provide a basis for monitoring Goal-3: Learning Needs of All Youths and Adults, Goal-4: Improving Levels of Literacy of Education for All programme of UNESCO. This book provides data on literacy for age group 7 and above as well as literacy data for adult population aged 15 years and above and youth population of 15-24 years. Literacy data of the Adolescents (10-19 age group) is given in Annexure III. Literacy data and its analysis based on NSS survey (2014) has also been added.

Literacy rate of the country of age group 7 years and above population has gone up to 73 percent by 2011 but the adult literacy rate is lagging behind by about 4 percent points. While the youth literacy (15-24) rate has gone up to 86 percent, the overall adult literacy rate is only 69 percent. India has over one third of the total 780 million adult illiterates of the world. Of the total 283 million illiterates of age group 7 and over of the country in 2011, 258 million forming over 90 percent are in the age group of 15 years and above. The UNESCO's goal of halving the adult illiteracy rate by 2015 i.e. reducing the illiteracy rate of 40 in 2000 to be reduced to 20 by 2015 is not likely to be achieved as we are falling much behind the target of 80 percent adult literacy. Analysis of the adult illiterate population by sex, caste, rural/urban and by States/UTs provides a basis for preparing long term/short term plans for reducing adult illiteracy in India.

I acknowledge with gratitude the confidence posed in me by Shri K.C. Choudhary, President and Dr. Madan Singh, General Secretary, Indian Adult Education Association to prepare this book based on the Census 2011. I also acknowledge with thanks for all the suggestions given and support extended by Dr. V Mohankumar, Director, Indian Adult Education Association while preparing this important book.

My sincere thanks are also due to Smt. Neha Gupta, Junior Librarian-cum-Documentation Assistant and Shri Kripal Singh Mehara, Programme Associate in the Association who have not only helped me with data entry but also in analyzing data, computing the entire book and preparing the graphs and diagrams. I am equally thankful to all the members of the staff of Association who have facilitated me during the preparation.

I am sure this book will be of immense use for the planners, implementers, researchers, field functionaries, adult educators in the field of adult education and literacy. Any suggestion or observation is always welcome.

Chapter - I

Total Population

India

According to census data, total population of the country as a whole, including the three sub divisions of Senapati District of Manipur which were initially not covered under census, increased from 1028.74 million in 2001 to 1210.85 million in 2011. Distribution of total population by sex and rural/urban areas for 2001 and 2011 is given below:

Statement 1 – Distribution of total population by sex and urban/rural areas

Item	2011			2001		
	Persons	Male	Female	Persons	Male	Female
Total	1210.85	623.27	587.58	1028.74	532.22	496.52

India accounts for 2.4 percent of the world surface area whereas its population forms 16 percent of the world population. Total increase in population during 2001-2011 was 182.12 million from 1028.74 million in 2001 to 1210.86 million in 2011. 51.5 percent of the total population was male and 48.5 percent were female. Sex ratio defined as the number of females per thousand males improved from 933 in 2001 to 943 in 2011. Percentage of urban population which was 27.8 in 2001 increased to 31.2 in 2011 and the corresponding percentage of rural population decreased from 72.2 in 2001 to 68.8 in 2011.

Demographic indicators of population 2001-2011 given below indicate how the growth rate of population, crude birth rate, crude death rate, infant mortality rate and percentage of child population declined during this decade and that the share of urban population and SC/ST population has increased.

Technical Group on Population Projections Constituted by the Planning Commission in their report of 2006 had projected a declining trend of population growth. It envisaged that the decadal growth rate of population which was 21.5 percent during 1991-2001 will come down to 15.9 during 2001-2011 i.e. decline of about 5.6 percent points. Total population was expected to increase from 1028.6 million in 2001 to 1192.5 million in 2011. However, the Census 2011 has shown that the decline fell slightly short of the level projected by the technical group. It came down by 3.8 percent points from 21.5 to 17.7. Average annual exponential growth rate came down from about 2 percent during the last five decades to around 1.6 percent during 2001-2011 indicating a declining trend.

Child population of the age group 0-6 which was 150 million in 1991 increased by about 13 million during the decade 1991-2001 and was 163.8 million in 2001. Its share in the total population came down from 17.9 percent of the total in 1991 to 15.9 percent in 2001. During 2001-2011, increase in the child population of the age group was less than one million from 163.8 million in 2001 to 164.5 million in 2011. Decadal growth rate goes down from 8.9 percent during 1991-2001 to 0.4 percent during 2001-2011. Its share in the total population went down from 15.9 percent in 2001 to 13.6 percent in 2011. This trend in the decrease of the share of child population in the total population indicates that the share of youth population is increasing over the decades and that it is leading to declining trend in the school age population during the next decade. The data further indicates that the marginal increase in the total child population during 2001-2011 was contributed by male child population as the female child population was stable at 78.8 million whereas

the male population increased from 85 million to 85.7 million.

Total Scheduled Caste population in the country in 2001 was 166.614 million i.e. 16.2 percent of the total population. It increased to 201.4 million and formed 16.6 percent of the total population. Scheduled Tribes population in 2001 was 84.33 million which was 8.2 percent of the total population of the country. It increased to 104.5 million in 2011 and formed 8.6% of the total population. This shows that the share of SC/ST population increased from 24.4 percent in 2001 to 25.2 percent in 2011.

Birth rate, death rate, infant mortality rate and total fertility rate are important demographic indicators and greatly influence size and growth of population. Population of the country increased at higher rate during the earlier decades due to higher birth rate and total fertility rates. Overall death rate and infant mortality rates which were also higher in the earlier decades have declined over the decades as a result of better health and medical facilities. Crude birth rate which was as high as 37.2 during 1971-1981 declined to 29.3 in 1991, 25.4 in 2001 and has further gone down to 21.8 in 2011 and to 21.4 in 2013. Death rate declined from 15 during 1971-81 to 9.8 in 1991, 8.4 in 2001, 7.1 in 2011 and to 7.0 in 2013. Infant mortality rate which was 120 in 1981 declined to 80 in 1991, 66 in 2001, 44 in 2011 and to 40 in 2013. Technical group on population projections in its report (2006) had envisaged that the total fertility rate of the country (average number of children born to a woman during reproductive period) which was 2.9 during 2004-05 would come down to 2.6 during 2006-10 and to 2.3 between 2021-26. Total fertility rate came down to 2.6 by 2009 and to 2.3 by 2013. It is expected to reach the replacement level of 2.1 by around 2021.

States/UTs

Table-1 in Annexure gives state/UT wise distribution of the total population for 2011 by sex and for urban areas and rural areas.

The highest population among the States/UTs was in Uttar Pradesh being 199.81 million. Two other states namely Maharashtra (112.37) and Bihar (104.10) were having population of over 100 million. Other 7 states having more than 50 million population were West Bengal (91.28), Andhra Pradesh (84.58), Tamil Nadu (72.15), Madhya Pradesh (72.63), Rajasthan (68.55), Karnataka (61.10) and Gujarat (60.44). Over three fourth of the total population (76.6 percent) resides in these 10 states.

Table-2 in Annexure gives State/UT wise distribution of Scheduled Castes and Scheduled Tribes population and its percentage to total population of all communities for 2011. Percentage of Scheduled Castes population was 20% or over in six states of Punjab (31.9%), Himachal Pradesh (25.2%), West Bengal (23.5%), Uttar Pradesh (20.7%), Haryana (20.2%) and Tamil Nadu (20.0%). The

other 5 states having SC population more than the national average of 16.6% are Uttarakhand (18.8%), Tripura (17.8%), Rajasthan (17.8%), Odisha (17.1%) and Karnataka (17.1%). There is no Scheduled Caste population in Mizoram (0.1%), Nagaland, Andaman & Nicobar Islands, Lakshadweep and Arunachal Pradesh.

As may be seen from **Table-2**, the States/UTs having more than 50% Scheduled Tribes population are Lakshadweep (94.8%), Mizoram (94.4%), Nagaland (86.5%), Meghalaya (86.1%), Arunachal Pradesh (68.8%), Dadra & Nagar Haveli (52.0%). Other States/UTs having more than 20% ST population are Manipur (40.9%), Sikkim (33.8%), Tripura (31.8%), Chhattisgarh (30.6%), Jharkhand (26.2%), Odisha (22.8%), and Madhya Pradesh (21.1%). There is no ST population in the States/UTs of Haryana, Punjab, Chandigarh, NCT of Delhi and Puducherry and it is very low in Bihar, Kerala, Tamil Nadu and Uttar Pradesh.

Table-3 in Annexure gives State/UT wise data on important demographic indicators such as percentage of urban population, growth rate of population, percentage of 0-6 population to total population, sex ratio, crude birth rate, crude death rate and infant mortality rate.

Highest urban population was in Delhi being 97.5 percent followed by Chandigarh (97.3%), Lakshadweep (79.1%), and the lowest urban population was in Himachal Pradesh (10.0%) proceeded by Bihar (11.3%), and Assam (14.1%).

Growth rate of population is not declining in some states at the rate it is declining at the national level Decadal Growth rate during 2001-2011 was the highest in Dadra and Nagar Haveli (55.59%) followed by Daman & Diu (53.8%). It was the lowest in Nagaland (-0.6%) followed by Kerala (4.9%). Sixteen states/UTs have lower birth rate as compared to the national average of 17.7.

Percentage of population aged 0-6 to total population in 2011 was higher than the national average of 13.6 in 11 states and one Union Territory. It was the highest of 19.2 in Meghalaya followed by 18.4 in Bihar. It was the lowest of 9.9 in Goa followed by 10.3 in Tamil Nadu.

Sex ratio was much lower than the national average of 943 in States/UTs of Daman & Diu (618), Dadra & Nagar Haveli (774), Chandigarh (818), NCT of Delhi (868), Andaman & Nicobar Islands (876), Haryana (879), Sikkim (890), Punjab and J & K (889) (895). It was more than 1000 in two states namely Kerala (1084) and Puducherry (1037).

The birth rate, death rate and infant mortality rates are further declining. Estimated birth rate for 2013 has gone down to 21.4. But some Hindi speaking states namely Bihar (27.6), Uttar Pradesh (27.2), Madhya Pradesh (26.3), Rajasthan (25.6) still have high birth rate. National infant mortality rate is estimated to have declined to 40 in 2013. But it is still high in case of states like Bihar, Madhya Pradesh, Odisha and Uttar Pradesh.

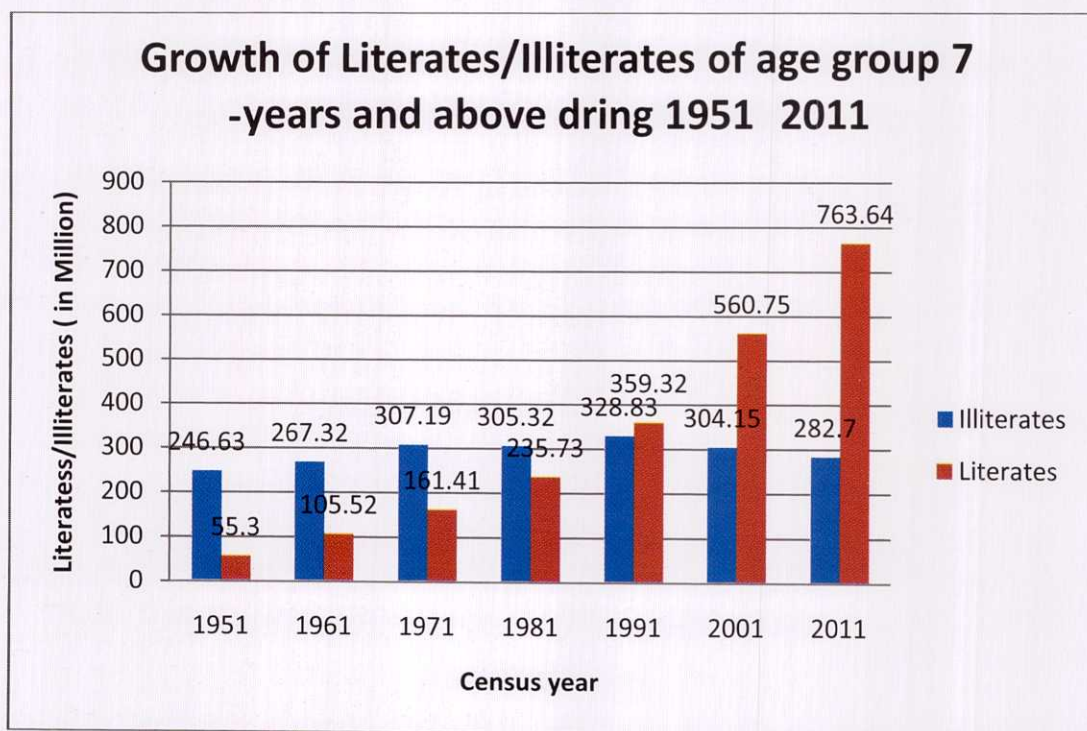

Chapter - II

Literacy Scenario of Population aged 7 years and above

A person aged 7 years and above who can both read and write with understanding in any language is treated as literate in Census (Effective Literacy). As children of the age group 0-6 are not classified as literate, literacy rates for population aged 7 years and above have been worked out from 1981 census onwards. For the census years 1951, 1961 and 1971 literacy rates for age group population of 5 years and above are given.

National Level

Increasing educational facilities during 1951-91 could not match increase in population. So despite increase in the number of literates and the literacy rates over the decades, number of illiterates continued to increase in terms of absolute numbers. It was for the first time in 2001 that the educational efforts took over the growth of population. As a result of this expanded base of educational facilities the position further improved by 2011.

The following statement depicts the literacy situation in terms of population, illiterates, literates and literacy rates from 1951 to 2011:

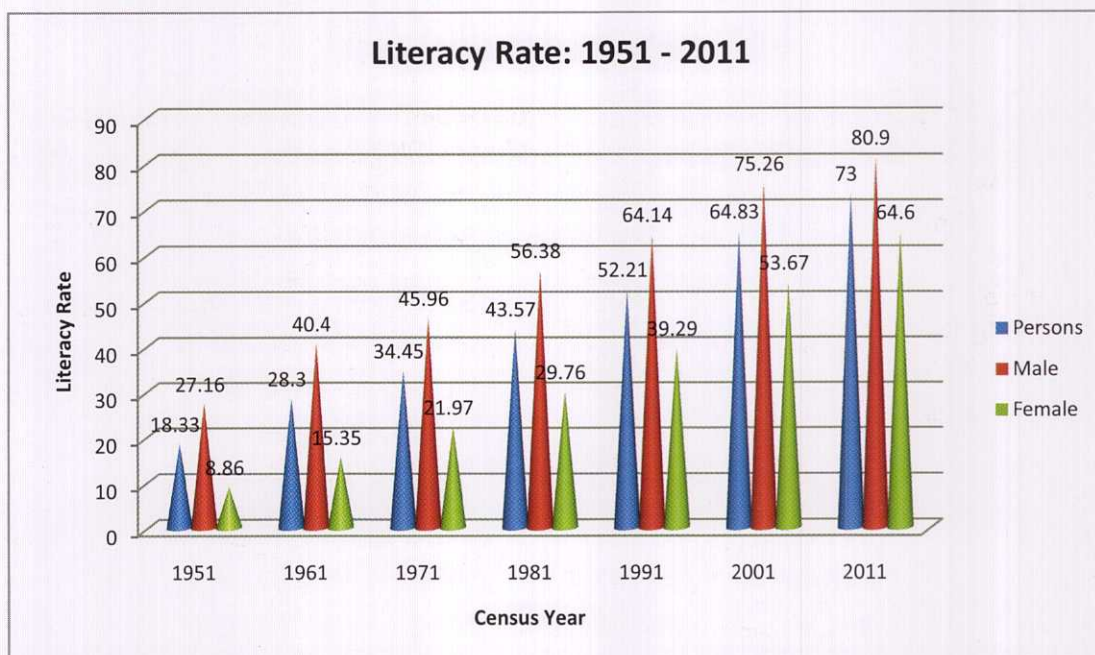

Statement 3 – Comparative Growth of Population, Illiterates and Literates during 1951-2011

Census Year	Population (Million)	Illiterates (Million)	Literates (Million)	Literacy rates	Increase in literacy rates
Literacy Position – 5+ age group					
1951	301.93	246.63	55.30	18.33	-
1961	372.84	267.32	105.52	28.30	9.97
1971	468.60	307.19	161.41	34.45	6.15
Literacy Position – 7+ age group					
1981*	541.05	305.32	235.73	43.57	9.12
1991**	688.15	328.83	359.32	52.21	8.64
2001	864.90	304.15	560.75	64.83	12.62
2011	1046.34	282.70	763.64	73.0	8.2

* Excludes Assam where 1981 census was not held

** Excludes Jammu & Kashmir where 1991 census was not held.

Increase in population during 1951-61 was by over 70 million whereas increase in the number of literates was by about 50 million. So the number of illiterates increased by over 20 million despite an increase in the literacy rate by about 10 percent points. Similarly the increase in population was higher than the increase in the number of literates during the decades 1961-71, 1971-81 and 1981-91. Increase in the literacy rate during these decades ranged between 6-9 percent points. During 1991-2001, literacy rate improved by 12.62 percent points from 52.21% in 1991 to 64.83% in 2001. This was the highest increase in literacy percentage over the decades. As a result of rise in literacy efforts, number of literates during the decade 1991-2001 increased by around 200 million. Average increase in the number of persons made literate per year rose from about 12 million during 1981-91 to 20 million during 1991-2001 and 2001-2011. For the first time absolute increase in the number of literates exceeded the absolute increase in population of the age group 7 and above in 2001. Consequently the number of illiterates declined by about 25 million from 328.8 million in 1991 to 304.1 million in 2001. During 2001-2011, increase in the number of literates exceeded the increase in population of the age group 7 and above by about 21 million. Consequently the number of illiterates declined from 304.1 million to 282.7 million.

Gender disparity in literacy rates was very acute in 1901. While the literacy rate for males was 9.83 percent, it was only 0.60% in case of females. After independence, the position improved over the decades as may be seen from the following statement:

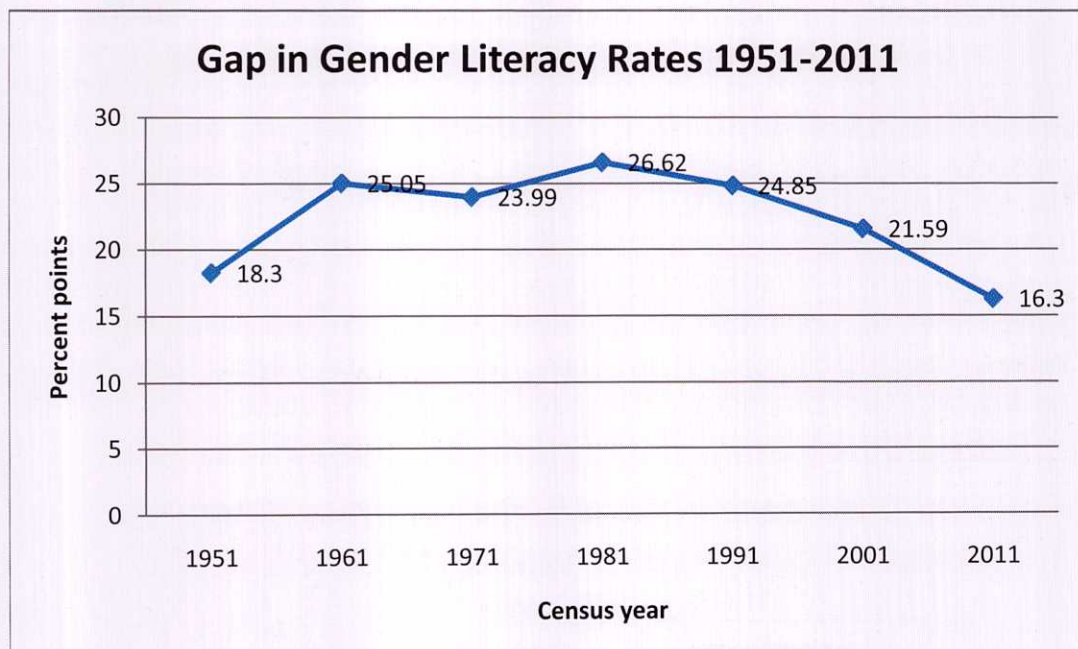

Statement 4 - Gender Disparity in Literacy Rates during 1951-2011

Year	Illiterates (million)		Literates (million)		Literacy Rates		Gap in Gender Literacy rates (% points)	Index of Gender Equality

2001	110.64	193.51	336.57	224.18	75.26	53.67	21.59	0.71
2011	102.75	179.95	434.76	328.88	80.9	64.6	16.3	0.80

* Excludes Assam

** Excludes Jammu & Kashmir

The above data indicates that the gap in male and female literacy continued to be around 25 percent points during 1961-91. During the decade 1991-2001, the gap between the literacy rates of the two sexes declined by about 3 percent points. Index of gender equality which was merely 0.33 in 1951 improved to 0.71 by 2001. During 2001-2011, the gender disparity in the literacy rates came down further by over 5 percent points from 21.6 to 16.3 and the gender equality improved from 0.71 to 0.80. This indicates that the female literacy rate has reached around 80 percent of the male literacy rate by 2011. Number of male literates increased from 42.39 million in 1951 to 434.76 million in 2011 by over ten times and the number of female literates which was only 12.91 million in 1951 increased by over 25 times to 328.88 million in 2011. Number of female literates was only 30 percent of the male literates in 1951, while it is 75% in 2011. Number of male illiterates which was 113 million in 1951 declined to 102.8 million in 2011. But the number of female illiterates which was 132.9 million in 1951 is still higher being 180 million in 2011. Female illiterates form 63.7 of the total illiterates.

There has been a large urban/rural differential in literacy rates. This differential was of the order of about 30 percent points upto 1981. It has shown a declining trend after 1981 as may be seen from the following statement:

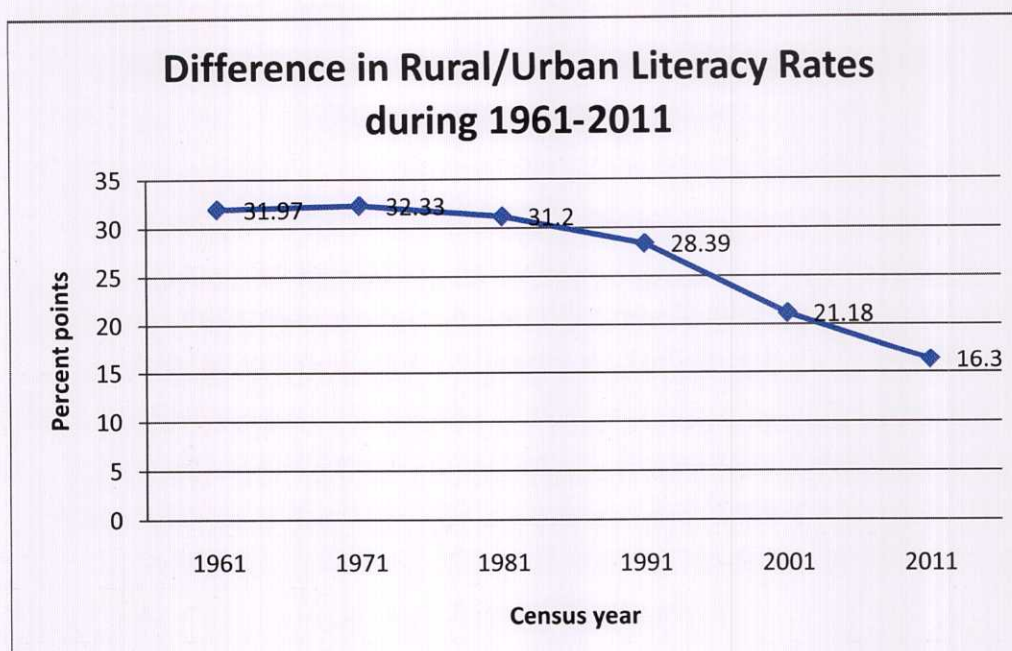

Statement 5 - Rural/Urban Differential in Literacy Rates

While about 84 percent of the urban population has become literate, literacy rate in rural areas is still below 70 percent. Difference in rural-urban literacy rates declined by about 3 percent points during 1981-91. The decline in the difference during 1991-2001 was of the order of 7 percent points. It was around 5 percent points during 2001-2011. Still the difference (16.3) continues to be high. Literacy rate for females in rural areas is still very low being only 57.9 percent as compared to 79.1 percent for females in urban areas. Differential between female literacy rates of urban and rural areas is as high as 21.2 percent points. Index of equality in literacy rates of rural/urban areas which was 0.41 in 1961 improved over the decades to reach 0.81 by 2011 indicating that the rural literacy rates had been increasing faster as compared to the urban literacy rates during these decades.

State level

Literacy rate at the national level reveals only a part of the story of disparities in literacy situation in the country. Literacy rates among the States/UTs range from 94.0 percent in Kerala to 61.8 percent in Bihar. Difference between the highest and the lowest literacy rate among States/UTs is of the order of 32.2 percent points. It is observed that while 10 states/UTs have high literacy rate of 85 percent and above, 14 States/UTs have literacy rate between 73.0 percent (the national average) and 85%. There are another 11 states/UTs which have literacy rate of below the national average of 73.0 percent. States/UTs arranged in descending order of their literacy rate in the above three categories are listed below:

The 11 low literacy states particularly Bihar, Arunachal Pradesh, Rajasthan, Jharkhand, Andhra Pradesh, Jammu & Kashmir, and Uttar Pradesh with less than 70% literacy need special attention to raise their literacy level so that they can reach upto the national average.

Tables 4 and 5 in Annexure contain Statewise data on population, illiterates, literates and literacy rates by sex and by urban/rural areas based on 2011 census.

Literacy rate in 2011 for rural areas varied from 93.0 percent in Kerala to 59.8 percent in Bihar and for urban areas it varied from 95.1 percent in Kerala to 75.1 percent in Uttar Pradesh. While literacy rate for male population varied from 96.1 percent in Kerala to 71.2 percent in Bihar, literacy rate for female population varied from 92.1 percent in Kerala to 51.5 percent in Bihar. Among the States, the highest literacy rate of 97 percent was in case of Kerala urban male population and the lowest rate of 49 percent in case of rural female population of Bihar.

Overall increase in literacy rates in the country during 2001-2011 was 8.2 percent points. It varied from 18.6 percent in Dadra and Nagar Haveli to 2.5 percent points in Mizoram. In case of 15 States/UTs literacy rate increased by more than the national average of 8.2 percent points whereas in the remaining 20 States/UTs the increase was less than the national average as may be seen from the following statement:

The low literacy states of Bihar, Jharkhand, Jammu and Kashmir, Uttar Pradesh, Arunachal Pradesh and the Union Territory of Dadra and Nagar Haveli made good efforts to reduce the gap between their literacy rate and the national literacy rate. High literacy states of Mizoram, Kerala, Maharashtra and the five Union Territories of Andaman and Nicobar Islands, Lakshadweep, Puducherry, Delhi and Chandigarh could raise their literacy rate not beyond 5.5 percent points.

Of the 283 million total illiterates in the country, the following ten states, having 10 million and above illiterates each were having around four fifth of the total illiterates of the country. 180 million female illiterates form 63.3 percent of the total illiterates. The same ten states also have around four fifth of the female illiterates of the country as may be seen from the following statement:

Uttar Pradesh alone with a literacy rate of 67.7 percent is having about one fifth of the illiterates of the country. Bihar with the lowest literacy rate in the country is next in terms of large number of illiterates. Rajasthan, Madhya Pradesh and Andhra Pradesh (including Telangana) are the other States falling in the category of having more than 5% of the illiterates of the country and having literacy rate below the national average of 73.0 percent. Maharashtra, West Bengal and Karnataka where the literacy rate is higher than the national average of 73.0 percent also have large number of illiterates.

Literacy rates for females were lower than the national average of 64.6

percent in the following 10 states and one Union Territory.

Rural/urban differential in literacy rates for the country was 21.2 percent points in 2001. It came down to 16.3 in 2011. The rural/urban differential varied from over 20 percent points in the States/UTs of Dadra and Nagar Haveli (25.66) Arunachal Pradesh (22.99), Jharkhand (21.14) and Meghalaya (20.87) to Lakshadweep (0.34), Kerala (2.12), Goa (3.30) and Delhi (4.46).

At the national level the rural/urban differential came down by 4.84 percent points during 2001-2011. The following statement indicates that the decrease was higher than the national average of 4.84 in 15 States/UTs and it was lower than the national average in the remaining 20 States/UTs.

District level

At the time of 2011 census, number of districts in the country was 640 as compared to 593 districts at the time of 2001 census. Disparity in literacy rates at the district level was very acute. It varied from 97.89 percent in Aizwal district of Mizoram State to 36.1% in Alirajpur district of Madhya Pradesh State.

Frequency distribution of districts by literacy rates in respect of all persons and females is given in the statement below.

Statement 15 - Frequency Distribution of Districts by Literacy Rate

	Range frequency	Cumulative frequency	Range frequency	Cumulative frequency

70-80	222	482	137	571
80+	158	640	69	640
Total	640		640	

It is observed that the literacy rate was not below 30 percent in any district of the country. There was only one district having literacy rate below 40 percent. Number of districts having literacy rate below 50 percent was 15. 78 districts of the country had overall literacy rate of below 60 percent and the number of districts having literacy rate above 80 percent was 158. Number of districts having female literacy rate below 40 percent was 17 and the number of districts upto 50 percent female literacy rate was 99. Most of the districts of the country had female literacy rate in the ranges of 50-60, 60-70 and 70-80. Only 69 districts had female literacy rate of above 80 percent.

Districtwise details for different States/UTs relating to number of illiterates, number of literates and literacy rates by sex for all areas, rural areas and urban areas are given in **Annexure - II**.

Review of the Progress of Adult and Youth Literacy - National Scenario

Adult Literacy

The following statement indicates the growth of adult population aged 15 years and above since 1951 onwards for the country during 1951-2011.

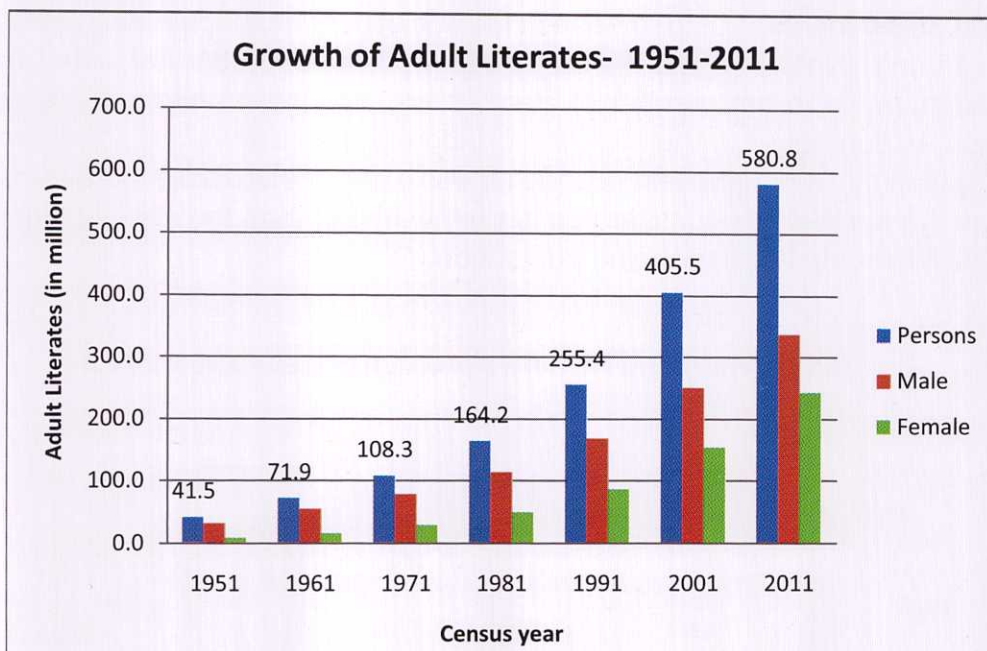

Statement 16 - Growth of Adult Population of the Age Group 15 Years and above 1951-2011

Decadal growth rate of population of the age group 15 and over increased from 20.2 during 1951-61 to 30.8 during 1981-91. It started declining from 1991 onwards. The growth rate of adult population during 1991-2001 (26.4) and 2001-2011 (26.1) are much higher as compared to the corresponding growth rates of total population during these decades viz. 21.5 for 1991-2001 and 17.7 for 2001-2011. Higher the growth rate of population, lower will be the literacy rate, other factors (including the number of literates of the age group) remaining the same. Thus the higher growth rate of adult population as compared to that of children impacted the adult literacy rate more than that of the literacy rate of the children of the lower age groups.

Number of literates of the age group 15 and over which was only 41.48 million in 1951 has gone upto 580.82 million by 2011 as may be seen from the following statement:

Statement 17 - Growth of Adult Literates of the Age Group 15 Years and above 1951-2011

The above data shows that the number of adult literates increased over the decades at over 50 percent from 1951 to 2001 and by over 40 percent during 2001-11 i.e. at higher growth rates as compared to the growth rate of corresponding population. But it is observed that the absolute increase in the number of literates

fell much below the absolute increase in the corresponding population during each decade during 1951 to 1991. It was during the decade 1991-2001, that for the first time increase in the number of literates viz. 150 million exceeded by about 11 million as compared to the increase of about 139 million in the corresponding adult population. During the last decade (2001-2011), the absolute increase of 175 million in the number of adult literates is slightly higher than the absolute increase of 173 million in the corresponding population.

Impact of higher literacy efforts during the last two decades has been observed in the declining trend in the number of adult illiterates as may be seen from the following statement of adult illiterates over the period of 1951-2011.

Statement 18 - Number of Adult Illiterates of the Age Groups 15 and over 1951-2011

It is observed that the number of adult illiterates continued to increase during 1951-61, 1961-71, 1971-81 and 1981-91. A decrease of about 11 million on account of a decrease of about 13 million in case of male illiterates was observed during 1991-2001. During 2001-2011, a small decrease of about 2 million contributed by both males and females has been observed. Total adult illiterates (257.58 million) form 91.1 percent of the total (282.70 million) illiterates of the age group 7 and over population. This shows that the illiterate children of the age group 7-14 (whose number is about 25 million) account for less than 10 percent of the total illiterates as against their share of about one fifth (19.9%) in 7 years and above population. The main challenge during the decade 2011-2021 therefore lies in decreasing the number of adult illiterates. Decreasing the number of illiterates of age group 7-14 even by their total number (25 million) will not raise the overall literacy situation of the country to the desired level. Adult illiteracy has to be reduced substantially during the next and future decades to take India towards universal literacy.

Literacy rate of the adult population which was only 19.27 percent in 1951 has gone upto 69.28 percent by 2011. Decadal increase in the adult literacy rate ranged from 6.32 percent points during 1961-71 to 12.43 percent points during 1991-2001 as may be seen from the following statement.

Statement 19 - Decadal Growth of Adult Literacy during 1951-2011

Gender disparity in literacy rates

The above data indicates that the average decadal increase in the adult literacy rates of male population was higher as compared to that of female population during the first three decades. During the last three decades, the decadal increase of female population took over that of male population. The gender gap in adult literacy rates which was 20.97 percent points during 1951 increased to 29.2 percent points by 1981 and has come down to 19.6 percent points in 2011 as may be seen from the following statement.

Statement 20 – Gender Disparity and Gender Parity Index of Adult Literacy Rates during 1951-2011

Census Year	Gender Disparity (percent points)	Gender Parity Index
1951	20.97	0.29
1961	28.30	0.32
1971	28.33	0.41
1981	29.20	0.47
1991	27.80	0.55
2001	25.53	0.65
2011	19.58	0.75

Gender parity index, which gives the ratio of male and female adult literacy rates, has improved over the decades from 0.29 in 1951 to 0.75 in 2011. There has been good improvement in the last two decades as the adult female literacy rate has increased at comparatively higher rates as compared to that of adult male literacy rates. The gap in the adult literacy rates of males and females continues to be high and needs special attention.

Rural/urban differential in adult literacy rates

Rural/urban differential in adult literacy rates is also very high. The following statement describes differential in rural/urban literacy rates by sex during 2001 and 2011.

Statement 21 – Gender and Spatial Disparity in Adult Literacy Rates 2001 and 2011

Sex	Year	All areas	Rural areas	Urban areas	Rural/urban differential	Rural/urban Parity index
Persons	2001	60.97	53.66	78.18	24.52	0.69

Gender Disparity	2001	25.53	29.01	16.16		
	2011	19.58	23.50	11.35		
Gender parity index	2001	0.65	0.57	0.81		
	2011	0.75	0.68	0.87		

Rural/urban differential in adult literacy rates was 24.52 percent points in 2001 for all persons. It came down by over 4 percent points during 2001-11 to reach 20.24 percent points in 2011. Rural/urban differential in case of male adult literacy rates was lower but was very high in case of females, which was 30.81 percent points in 2001 and 26.37 percent points in 2011 as compared to 17.96 and 14.22 percent respectively in case of males.

Gender disparity in adult literacy rates was higher in rural areas as compared to that of urban areas. It was 29.01 for rural areas as compared to 16.16 for urban areas in 2001. During 2001-11, the gender disparity came down by over 5 percent points in all areas, rural areas as well as urban areas. Gender parity index improved by 0.10 points during 2001-11 for all areas. In case of rural areas it improved by 0.11 points whereas in case of urban areas it improved only by 0.06 points. The gender disparity in rural areas is still very high as compared to that of urban areas.

Adult literacy rate varies widely among the States/UTs. It varies from 93.46 percent in Kerala to 55.41 percent in Bihar. Difference between the highest and the lowest adult literacy rates among States/UTs is of the order of 38 percent points. It is observed that 12 States/UTs have high literacy rate of 80 percent and above, 13 States/UTs have literacy rate between the national average (69.28 percent) and 80 percent. The remaining 10 States have literacy rate below the national average of 69.28. States/UTs arranged in descending order of their adult literacy rate in these three categories are shown in the following statement.

The low literacy States particularly Bihar, Rajasthan, Jharkhand, Arunachal Pradesh, Andhra Pradesh, Uttar Pradesh and Jammu & Kashmir need special attention to raise their literacy level so that they can reach upto the national average.

Table-6 in Annexure contains state wise data on population and illiterates and **Table-7** contains data on literates and literacy rates by sex and by rural/urban areas based on 2011 Census. Adult literacy rates of rural areas vary from 92.29 percent in Kerala to 52.67 percent in Bihar and for urban areas it varies from 94.74 percent in Kerala to 74.73 percent in Bihar. The rural/urban differential in adult literacy rates vary from 33.51 percent in Dadra & Nagar Haveli to 2.44 percent in Kerala. In Lakshadweep the rural adult literacy rate was slightly (0.5 percent) higher than the urban adult literacy rate.

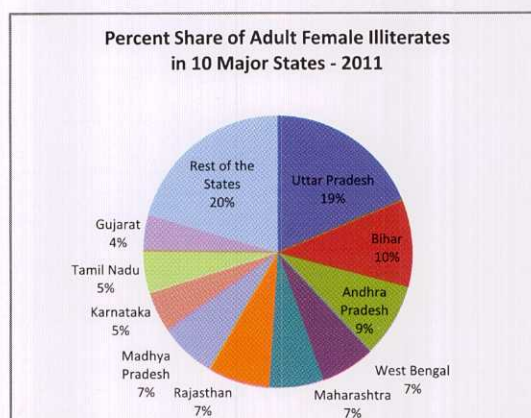

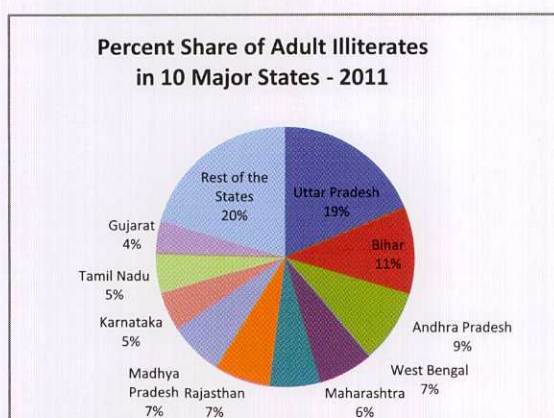

Adult literacy rates for male population varies from 96.01 percent in Lakshadweep to 67.45 percent in Bihar and the female adult literacy rates vary from 91.27 percent in Kerala to 42.24 percent in Bihar. Gender disparity in the adult literacy rates vary from 32.55 percent in Rajasthan to 4.66 in Kerala.

The following statement gives an idea of rural/urban and gender disparities in different States/UTs of the country on the basis of adult literacy rates of 2011.

Of the 257.58 million adult illiterates in 2011, 204.97 million comprising about four fifth of the total were in 10 states having more than 10 million adult illiterates each as may be seen from the following statement The data below also indicates that about four fifth of the adult female illiterates were also contributed by these ten states.

The above data indicates that the number of adult illiterates in these ten states taken together declined marginally during 2001-11. But in four states of Uttar Pradesh, Bihar, Rajasthan and Madhya Pradesh it actually increased during 2001-11 also.

Youth literacy

The following statement gives the number of illiterates, literates and literacy rates of youth population of the age group 15-24 since 1961 onwards.

Statement 25 – Number of Illiterates, Literates and Literacy Rates of Youth Population of Age Group 15-24 Years 1961- 2011

Number of illiterates of youth population (15-24) increased from 46.88 million in 1961 to 58.48 million in 1991 after which it started declining and came down to 32.13 million in 2011. The same trend is followed in case of male and female illiterates of the youth population. number of youth literates has been increasing sharply over the decades and has gone up from 26.33 million in 1961 to 199.81 million in 2011 giving over 6 times increase in five decades. The total increase of

about 173 million during 1961-2011 is shared by males 52 percent and females 48 percent. Literacy rates of the youth population have also improved sharply from about 36 percent in 1961 to around 86 percent in 2011. While the male literacy rate has gone up from 51 percent in 1961 to 90 percent in 2011, female literacy rate has also reached nearly 82 percent.

Youth literacy rate of urban areas of the country is over ninety percent but that of the rural areas is lower by about 8 percent points being 83.67. Female youth literacy rate of urban areas is about ninety percent (90.03) but the youth female literacy rate of rural areas is about 12 percent points below as may be seen from the following statement:

**Statement 26: Gender and Spatial Disparity In Youth Literacy Rates
2001 and 2011**

Sex	Year	Youth literacy rates			Rural/urban differential	Rural/urban Parity index

Gender parity index	2001	0.80	0.74	0.93		
	2011	0.91	0.88	0.97		

Gender disparity in youth literacy rates of all areas which has come down by about 8 percent points during 2001-11 is still over eight percent points and gives a gender parity index of 0.91 as against the desired level of unity. Gender disparity of 10.8 percent of 2011 as against 20.8 of 2001 in rural areas is still higher as compared to that of urban areas which is only 2.6 percent points for 2011 and 6.4 for 2001. Gender parity index of the youth literacy rates in urban areas has reached around unity (0.97), it is 0.12 points below unity in case of rural areas.

Rural/urban differential in youth literacy rates which has declined during 2001-11 by about 8 percent points is still around eight percent points (7.73). The rural/urban parity index for 2011 works out to 0.92. Rural/urban differential in case

of youth female literacy rate is about 12 percent points in 2011 (as against 23 in 2001). It is still much higher as compared to about 4 percent points in case of male youth literacy rates. The rural/urban parity index in case of male youth literacy rates has reached 0.96 as against 0.87 in respect of female youth literacy rates.

Table-8 in Annexure gives state wise number of illiterates, literates and literacy rates of the youth population. Literacy rates of youth population vary from 99.04 percent in Kerala to 72.29 percent in Bihar. While male youth literacy rates range between 99.04 in Kerala to 79.56 percent in Bihar, female youth literacy rates range between 99.03 in Kerala to 63.69 in Bihar. The above data shows that 25 States/UTs have youth literacy rate above the national average of 86.14 percent and that another 8 States/UTs have youth literacy rate of above 80 percent but below the national average. Only two states of Jharkhand and Bihar have youth literacy rate below 80 percent. Male youth literacy rate is above 80 percent in all States/UTs except Bihar where also it is around 80 percent. Female youth literacy rate is also 80 percent in 26 States/UTs and is below 80 percent in the remaining 9 States/UTs.

District wise details of illiterates, literates and literacy rates for youth population of age group 15-24 for all areas and rural areas, on the basis of 2011 Census is given in **Annexure-III**. It also contains district wise data on illiterates, literates and literacy rates of adolescent population of the age group 10-19.

It is observed that only two districts have youth literacy rate below 50 percent. 9 districts have youth literacy rate between 50-60 percent, 40 districts have youth literacy rate of 60-70 percent and 96 districts have youth literacy rate of 70-80 percent. 493 districts forming 77.0 percent of the total have youth literacy rate of above 80 percent. 15 districts have female youth literacy rate below 50 percent, 33 districts have female youth literacy rate of 50-60 percent. Chapter - IV

A Review of the Progress of Adult and Youth Literacy – Global Scenario

Adult Literacy

The World Education Forum which met in Dakar in 2000 adopted six 'Education For All' goals for holistic development of education including goal No. 4 of achieving a 50 Percent improvement in levels of adult literacy by 2015 especially for women, and equitable access to basic and continuing education for all adults. Since then, the EFA Global Monitoring Reports have monitored the progress of achieving these goals over the years. EFA Global Monitoring Report 2006 'Literacy For Life' indicated that the adult literacy rate for the world as a whole which was 75.4 percent in 1990 had moved up to 81.9 percent during the period 2000-2004 and it was projected that it will go up to 85.8 percent by 2015. Number of adult illiterates which was 872 million in 1990 had declined to 771 million by 2000-2004. Share of female illiterates was 64 percent during 2000-2004. The 2015 Global Monitoring Report indicates that the adult literacy rate during the period 2005-2012 improved to 84 percent with male literacy rate of 89 percent and female literacy rate of 80 percent. It has been projected that the world adult literacy rate may go up to 86 percent by 2015 with male literacy rate of 90 percent and female literacy rate of 82 percent. Number of adult illiterates as per the estimates for 2005-2012 period was 781 million i.e. 10 million higher than the estimated 771 million for 2000-2004 (EFA GMR 2006). Number of adult illiterates by 2015 has now been estimated to go down to 751 million. Gender disparity in adult literacy rates is persisting as the female illiterates continue to form 64 percent of the total illiterates for 2005-2012 as well as those projected for 2015.

The Regions which are much lagging behind in adult literacy are Sub Sahara Africa, South and West Asia and Arab States. The following statement brings out the regional disparity in adult literacy rates of the period 2005-2012 and those projected for 2015. It also indicates gender disparity in the adult literacy rates in different regions and the world as a whole.

Statement 28 - Adult Literacy Profile of the World and different Regions 2005-2012 and 2015

The above data indicates that while the two regions namely Central and Eastern Europe and Central Asia, would have reached the Universal Adult Literacy, another two regions namely East Asia and the Pacific and Latin America and the Carrabin are moving towards the goal of Universal Literacy. North America and Western Europe Region for which data is not available also falls in the category of higher adult literacy rates as most of the Countries of this region for which data is available have indicated adult literacy rates between 91 to 99 percent. Arab States are estimated to have reached adult literacy level of 80 percent by 2015 which is 6 percent points lower as compared to the world average of 86 percent. South and West Asia with adult literacy rate of 69 percent in 2015 and Sub Sahara Africa with merely 63 percent are estimated to be lagging behind by 17 and 23 percent points respectively. The two regions namely South and West Asia (51.7 percent) and Sub-Sahara Africa (26.2 percent) account for over three fourth of the total estimated adult illiterates of the world.

Table-9 in Annexure gives adult and youth literacy rates of 26 important countries of the World for the period 2005-12.

According to the 2005-2012 estimates, 8 Countries having around 10 million or more adult illiterates each account for 61.5 percent of the total adult illiterate population of the world and have 479.33 million adult illiterates. These countries are India, China, Pakistan, Bangladesh, Egypt, Indonesia, Afghanistan and Iran as may be seen from the following Statement:

Statement 29 - Adult Literacy Rate and Adult Illiterate Population (15 and over) by Country – 2005-2012

Country	Adult Literacy Rate	Adult illiterate Population (in million)	Share of World Total
India	63	285.52	36.6
China	95	53.88	6.9
Pakistan	55	49.23	6.3
Bangladesh	59	44.30	5.7
Egypt	74	14.59	1.9
Indonesia	93	12.32	1.6
Afghanistan	32	10.34	1.3
Iran	84	9.15	1.2
World	84	780.68	100.00

Source: EFA Global Monitoring Report -2015

The largest share of the adult illiterates (36.6 percent) is in India followed by China (6.9 percent), Pakistan (6.3 percent) and Bangladesh (5.7 percent). It may be mentioned here that adult literacy rate of India according to 2011 Census was 69 and the number of adult illiterates was 258 million. (Chapter III)

The following eight countries are members of the SAARC (South Asian Association for Regional Cooperation). Adult illiterate population of these countries accounted for 97 percent of the South and West Asia region and 51 percent of the total world adult illiterates in 2005-12. The following statement gives country wise data in respect of each of the SAAR Countries.

Statement 30- Adult Literacy Rate and Adult Illiterate Population (15 and over) for SAARC Countries 2005-2012

Country	Adult literacy rate	Adult illiterate population (in million)	Percentage to total illiterate population
Afghanistan	32	10.34	2.6
Bangladesh	59	44.30	11.1
Bhutan	53	0.20	0.1
India	63	285.52	71.7
Maldives	98	0.003	-
Nepal	57	7.23	1.8
Pakistan	55	49.23	12.4
Sri Lanka	91	1.36	0.3
Total SAARC Countries	63	398.18	100.00

It is observed that about 95 percent of the adult illiterates of the SAARC countries reside in three countries namely India, Pakistan and Bangladesh. Maldives and Sri Lanka have high adult literacy rates. Adult literacy rate of Afghanistan is very low and the number of adult illiterates is also over 10 million. Adult literacy rates of Nepal and Bhutan are also lower as compared to the adult literacy rate of around 63 percent for the SAARC Countries.

The rate of adult illiteracy which was 18 percent in 2000 is likely to have dropped to 14 percent in 2015 i.e. by about 23 percent. The target of halving the global illiteracy rate to around 9 percent proved to be a difficult/unachievable task. Only 17 out of 73 countries with literacy rate below 95 percent in 2000 halved their illiteracy rates. Adult illiteracy rate is projected to fall during 15 years period

between 2000-2015 only by 13 percent in Sub-Sahara Africa, 26 percent in South and West Asia, 36 percent in Latin America and the Caribbean and 39 percent in the Arab States. However the target is projected to have been reached in Central and Eastern Europe (52%), East Asia and the Pacific (52%) and Central Asia (65%). Number of adult illiterates is projected to fall only marginally from 787 million in 2000 to 751 million in 2015. Number of adult illiterates is projected to remain constant in South and West Asia at 388 million and to increase by 26 percent in Sub-Sahara Africa at 197 million. Gender disparity in adult literacy rates has not improved much. Gender Parity Index is estimated to have moved from 0.89 in 1995-2004 to 0.91 in 2005-2012. 64 percent of the adult illiterate population was female in 2000 and this percentage is projected to continue to be the same in 2015. The challenge before the international community in the post 2015 era is to bring the adult literacy rates of the Sub-Sahara Africa, South and West Asia and Arab States to the literacy level of the world as a whole.

Youth Literacy (15-24)

Youth literacy rate for the world as a whole was 87 percent during 1995-2004. It improved to 89 percent during 2005-12 and is projected (EFA GMR – 2015) to have reached to 91 percent by 2015. In case of youth literacy, females are not lagging much behind. Youth female literacy rate which was 87 percent during 2005-12 is projected to have gone upto 90 percent in 2015. Number of youth illiterates which was 138.94 million during 1995-2004, came down to 125.59 million during 2005-12 and is projected to have declined to 103.19 million by 2015. Share of youth female illiterates is projected to have declined from 61% during 2005-12 to 57% by 2015.

Regions which are lagging behind in youth literacy are also the same as in case of adult literacy as may be seen from the following statement:

Statement 31- Youth Literacy Profile of the World and Different Regions 2005-12 and 2015

The above data indicates that the two regions namely South and West Asia and Sub-Sahara Africa during 2005-12 had youth literacy rates below the global youth literacy rates by 9 and 20 percent points respectively and are likely to reduce the gap to 4 and 18 points by 2015. Youth literacy rate of the Arab State is almost at the global level. Other regions have either reached universal youth literacy or are heading towards this goal. About 95 percent of the total youth illiterates of the world reside in these three regions. The countries having more than 5 million youth illiterates each during 2005-12 are India (40.5 million), Pakistan (10.8 million), Nigeria (9.7 million), Ethiopia (7.1 million) and Bangladesh (6.2 million). Number of youth illiterates in China was less than one million.

Number of youth illiterates in India as per 2011 Census was 32.1 million. It has been projected by Unesco office of Statistics that number of youth illiterates in India will go down to 23.03 million with youth literacy rate of 90 percent by 2015. **Table-9** in Annexure gives youth literacy rates of 26 important countries of the world for 2005-12 period. It is observed that the youth literacy rates are below the global level of 89 percent in 9 countries comprising of Arab States (1), South and West Asia (6) and Sub-Sahara Africa (2). The lowest youth literacy rate of 47 percent relates to Afghanistan followed by 71 percent for Pakistan and 72 percent for Malawi. Youth literacy rates are expected to improve faster as compared to that of the older age group population.

Scheduled Castes

Age group 7 and above SC population

Comparative literacy position among SCs as compared to the literacy rate of all castes for the years 2001 and 2011 is given in the statement below:

**Statement 32- Comparative Literacy Position of SCs and All Castes

The above data indicates that the adult literacy rates of STs in 2011 varied from a very high rate of 91.50 percent in Mizoram to a low of 39.61 percent in Andhra Pradesh. 12 States/UTs have ST Adult literacy rates higher than the national average of 69.28 percent for adult literacy rate of all communities. The remaining 18 States/UTs have adult ST literacy rate below this national average of all communities. ST female adult literacy rate varies from 89.14 percent in Mizoram to as low as 25.86 percent in Rajasthan.

Chapter - VI

Impact of Adult Literacy Programmes on Adult Literacy Situation during the last Two Decades

Literacy data is presented by quinquennial age groups such as 10-14, 15-19, 20-24, 25-29, 30-34 etc. and is classified by educational levels. Minimum educational level in census is known as 'literate without educational level'. It includes those persons who have acquired literacy without going to formal school and those who became literate in the formal schooling system before completing the primary level of education. Other educational levels are primary, upper primary, matriculation/higher secondary, diploma, degree etc.

The following statement gives the progress of literacy rates of different age groups from 1961 onwards on the basis of Census data. Details relating to population, number of illiterates, literates and literacy rates for different age groups are given in **tables 14, 15 and 16** of the Annexure.

Statement 44 – Progress of Literacy Rates by Different Age Groups – 1961-2011

Year	Literacy rates by major age groups					
	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35+ years
1961	42.26	38.43	33.60	28.53		22.25
1971	49.62	51.34	44.73	34.79		25.20
1981	56.38	55.42	52.02	45.07		30.27
1991	68.79	65.77	57.79	52.06	49.31	39.00
2001	81.71	79.29	73.23	67.05	61.68	49.96
2011	91.15	88.83	83.24	77.68	72.54	57.14

Literacy rate of the age group 10-14 increases mainly as a result of the efforts of the formal system of education. It increased from 42.26 percent in 1961 to 91.15 percent during the last five decades. The 10-14 age cohort of 1961 reached to 20-24 age group in 1971. The literacy rate of the cohort 10-14 of 1961 improved from 42.26 in 1961 to 44.73 when it reached the age group 20-24 in 1971. Similarly the age cohort of 10-14 of 1971 improved its literacy rate from 49.62 percent in 1971 to 52.02 when it reached the age group 20-24 in 1981. Similarly the other age cohorts when they progress to higher age groups retain their already acquired literacy level and in the process improve it further. All the literates of the age cohort 10-14 who

acquired their literacy status upto the age of 14 years continue to be classified as literate even when they acquire further education during their progression to higher age groups as literate status includes all levels of education. Those illiterates of the age cohort who acquire 'literate status' during the progression increase the literacy rate of the age cohort. After 14 years of age, an illiterate does not normally join a formal school for becoming literate. He acquires literacy mainly through adult literacy programmes. Literacy rate of the age cohorts comprises of its own literacy rate acquired through formal education system and the improvement made further during the progression period through adult literacy programmes. The other two factors which can impact the literacy rate of an age cohort are (1) death and (2) migration. It is assumed that the death factor applies equally to literates and illiterates and does not affect the literacy rate materially. When we are considering the literacy rates at the national level, migration factor is not considered significant.

Impact of formal system of education and that of adult literacy programmes on the adult literacy rates during the decades 1991 and 2001 and 2000-2011 has been analyzed in this chapter.

1991-2001

Literacy rate of the adult population increased by 12.43 percent points during 1991-2001 from 48.54 percent in 1991 to 60.97 percent in 2001. The number of literates increased by 150 million from 255.42 million in 1991 to 405.47 million in 2001. Contribution of adult literacy programmes in this increase of the adult literates during the decade works out to 37 million as may be seen from the following analysis.

Age cohorts of 1991 progressed as under during the decade 1991-2001:

<u>Age group in 1991</u>		<u>Age group in 2001</u>
5-9	—————→	15-19
10-14	—————→	20-24
15-19	—————→	25-29
20-24	—————→	30-34
25 and over	—————→	35 and over

Literacy rate of age group 20-24 population in 2001 would have been the same as that of the age group population of 10-14 in 1991, if it was not affected by (1) National Migration and (2) Adult literacy programmes. Assuming that the death factor which applies both to literates and non literates and the National Migration do not materially change the literacy rate of an age cohort, the following statement gives the impact of the progression of different age cohorts to the higher age groups over the decade.

**Statement 45- Impact of Progression of Literates to Higher Age Groups
during 1991-2001 (Impact of Formal Schooling)**

Age cohort 1991	Age group 2001	Progression literacy rate 2001 (age cohort 1991)	Population In 2001 (million)	Projected Number of progression literates (in million)
5-9	15-19	72*	100.22	72.16
10-14	20-24	68.79	89.76	61.74
15-19	25-29	65.77	83.42	54.86

25 & over	35 & over	43.04	317.33	136.58
Total	15 & over	55.38	665.00	368.26

*Estimated

Literacy rate of age cohort 5-9 of 1991 which progressed to age group 15-19 in 2001 is not available as per census data. Literacy rate of this age cohort has been estimated assuming that this age cohort would have improved its literacy rate through schooling system during the decade and that its literacy rate would have been higher than the literacy rate of age group 10-14 of 1991 by about 3 percent points which progressed to age group 20-24 in 2001.

The number of adult literates of age group 15 years and above in 1991 as per the Census data was 255.42 million. The above table indicates that it would have gone up to 368.26 million as a result of progression of literates from lower to higher age groups and the adult literacy rate would have gone up to 55.38 percent. As per 2001 census, number of adult literates was 405.47 million. An increase of about 37 million over and above the 368 million mark based on progression can be attributed to adult literacy programmes of the decade 1991-2001. It contributed to an increase of adult literacy rate by over 5 percent points from the projected rate of 55.38 to 61.00 percent.

2001-2011

Literacy rate of the country during the decade 2001-2011 improved only by 8.2 percent points from 64.8 in 2001 to 73.0 in 2011. Adult literacy rate improved by 8.3 percent points from 61.0 in 2001 to 69.3 in 2011. Contribution of the adult literacy programmes was only about 15 million during the decade as may be observed from the data given in the following statement:

Statement 46 - Impact of the Progression of Literates to Higher Age Groups during 2001-2011 (Impact of Schooling System)

Age cohort 2001	Age group 2011	Progression literacy rate 2011 (age cohort 2001)	Population in 2011 (million)	Projected number of progression literates (million)
5-9	15-19	85*	120.52	102.44
10-14	20-24	81.71	111.42	91.04
15-19	25-29	79.29	101.41	80.41
20-24	30-34	73.23	88.59	64.87
25 & over	35 & over	54.80	416.46	228.22
Total		67.63	838.40	566.98

*Estimated

The above statement indicates that the adult literacy rate of the country would have improved, irrespective of the adult literacy programmes, from 61.0 percent in 2001 to 67.6 percent in 2011 and the number of adult literates would have gone up from 405.47 million in 2001 to 566.98 million in 2011. As per the 2011 census data, adult literacy rate in 2011 was 69.3 percent and the number of adult literates was 580.82 million. Contribution of adult literacy programmes of 2001-2011 works out to around 15 million and to an increase of about 2 percent points in the adult literacy rate during the decade 2001-2011.

Chapter – VII

Emerging Adult and Youth Literacy Situation in 2021

Adult literacy

Adult literacy rates are affected by the growth of adult population and educational effort through formal schooling and adult literacy programmes. Leaving aside for the time being the effect of adult literacy programmes on adult literacy situation, impact of formal system of schooling which is reflected through progression of lower age cohorts benefitted by the formal schooling system to higher age groups over a period of time, is being projected for the decade 2011-21. During this period age cohorts 5-9, 10-14, 15-19, 20-24 and 25+ of 2011 will progress to adult age groups of 15-19, 20-24, 25-29, 30-34 and 35+ in 2021. Progression literacy rates of the age cohorts in 2021 will be the same as their literacy rates in 2011 except that of the age cohort 5-9, which will improve its literacy rate through formal schooling system during this period also. Population projection data made available by the expert group on population projections set up by the Population Commission released in 2006 has been used with adjustment for age groups 15-19 and 20-24 years based on the difference between the actual and projected population of 2011 census for age groups 5-9 and 10-14 which will progress to these age groups in 2021.

Using the method of transition of age group cohorts to higher age groups over the decade 2011-21 and the projected population for 2021, literacy rate of the age group 15 and over for the year 2021 has been estimated as under:

Statement 47: Projection of Literacy Situation of Age Group 15 and over in 2021

Age cohort in 2011		Age group in 2021	Literacy rate age cohort 2011	Progression literacy rate 2021	Projected population (in million) 2021	Estimated literates (in million) 2021
5-9	→	15-19	Not available	94*	125.6	118.1
10-14	→	20-24	91.15	91.15	131	119.4
15-19	→	25-29	88.83	88.83	119.7	106.3
20-24	→	30-34	83.24	83.24	115.7	96.3
25 and over	→	35 and over	62.8	62.8	538.0	337.9
Total (15 and over)			69.3	75.5	1030.0	778.0

*Estimated on trend analysis

Literacy rate of the age group 15 and over, on the basis of progression method is projected to increase from 69.3 percent in 2011 to 75.5 percent in 2021. Number of literates is projected to increase from 580.8 million in 2011 to 778 million in 2021, an increase of about two hundred million over a period of ten years. Adult literacy efforts during the decade 2011-21 will contribute to improve the adult literacy over and above the projected rate of 75.5 percent. Goal 4 of the Education for All programme of Unesco envisaged halving of the adult illiteracy rates of different countries of the world during 2000-15. In case of India, it meant reducing the illiteracy rate of about 40 percent in 2000 to 20 percent in 2015. This target could not be reached by 2015. If India sets target of achieving 80 percent adult literacy by 2020-21, it needs to make a contribution of 46 million adult literates during 2011-21 through adult literacy programmes. Number of adult illiterates in India in 2011 was 257.58 million. The projected data on the basis of progression method indicates that there will still be over 250 million adult illiterates in 2021. Number of adult illiterates will decline to the extent of adult literacy programmes are able to make their contribution in reducing adult illiteracy.

Youth literacy

By using the progression method, youth literacy rate excluding the impact of adult literacy programmes, is projected to improve from 86.14 percent in 2011 to 92.6 percent in 2021 as may be seen from the following statement.

Statement 48- Projection of Literacy Situation of Youth in 2021

Age cohort 2011		Age group 2021	Progression literacy rate	Projected population (in million) 2021	Estimated literates (in million) 2021
5-9	→	15-19	94*	125.6	118.1
10-14	→	20-24	91.15	131.0	119.4
Total (15 - 24)			92.6	256.6	237.5

*Estimated on trend analysis

The above analysis indicates that the number of literates of age group 15-24 is estimated to increase from 199.8 million in 2011 to 237.5 million in 2021, an increase of 37.7 million over a period of ten years. Number of illiterates is estimated to decline from 32 million in 2011 to 19 million in 2021. Adult literacy efforts during 2011-21 are expected to improve the youth literacy position further.

Chapter – VIII

Literacy Rates based on National Sample Survey

Analysis of the NSS Sample Survey Data on Literacy

The most important source of literacy data in India is the population census conducted every ten years by the Registrar General and Census Commissioner of India. The National Sample Survey (NSS) Office of Ministry of Statistics and Programme Implementation conduct all India household sample surveys on Social Consumption. Literacy data is available as part of these Survey Rounds. Literacy data available from sample surveys during the last two decades has been used. A person who can read and write a simple message in any language with understanding is considered literate in NSS surveys.

Literacy Rates of Age group 7 years and above population

Statement below gives comparative data from NSS surveys conducted immediately before and after the 2001 census.

Statement 49: Comparative literacy rates of age group 7 years and over based on NSS surveys and census during the decade 1996-2005

Area/Sex	NSS Survey 55 th round (1999 - 2000)	Census 2001	NSS Survey 61 st round (2004 - 2005)	Annual increase during 2001- 2004
<u>All Areas</u>				
Persons	62	64.83	67.3	0.82

Male	87	86.27	88.8	0.84
Female	72	72.86	75.9	1.01

Census 2001 data when compared with survey estimates for 1999-2000 indicated that the survey literacy rates improved by over one percent point annually for all areas and rural areas upto the time of the census in 2001. But the literacy rates for urban areas remained almost the same during this period. This shows that the literacy rates of rural areas improved faster as compared to that of urban areas.

Results of the NSS survey 2004-2005 when compared with 2001 census data indicate that the literacy rates of all areas improved only by 0.82 percent points annually during 2001-2004. The survey data also shows that the rural literacy rates improved at faster rate as compared to that of urban literacy rates. The female literacy rate also increased faster as compared to the literacy rate of male population.

Statement below gives comparative data from NSS surveys conducted before and after Census 2011.

Statement 50: Comparative literacy rates of age group 7 years and over based on NSS surveys and census during the decade 2006-2015

Area/Sex	NSS Survey (64 th round) 2007 - 2008	Census 2011	NSS Survey (71 st round) 2014	Annual increase during 2011 - 2014
<u>All Areas</u>

Male	89.9	88.8	91.1	0.77
Female	78.1	79.1	80.8	0.57

Census 2011 data when compared with the results of 2007-8 NSS survey shows that the literacy rates during 2007-08 and 2011 improved at a low rate in case of all areas and rural areas and did not improve at all in case of urban areas. Results of the NSS survey 2014 (Jan14-June14 with midpoint date of 31st March

2014) shows that the literacy rate of all areas improved annually by 0.80 percent points while that of rural and urban areas improved by 1.00 and 0.60 percent points respectively. Literacy rates of females in rural areas and all areas increased at comparatively faster rates as compared to that of male literacy rates. But in case of urban areas male literacy rates increased at a faster rate as compared to that of female literacy rate. Gender gap in literacy rates came down from 16.3 percent points in 2011 to 16.1 percent points in 2014. Rural/Urban differential in the literacy rate which was 16.3 percent points in 2011 came down to 15.1 percent points in 2014.

State wise literacy rates for age group 7 years and above population based on the 2014 survey by rural/urban areas and by sex are given in Table -17 of Annexure. The literacy rates of all persons vary from 96.2 percent in Mizoram, 95.7 percent in Nagaland and 95.2 percent in Kerala to as low as 67 percent in Bihar preceded by 67.6 percent in Rajasthan and 67.7 percent in Telangana. Rural female literacy rates are lower in Andhra Pradesh, Bihar, Jharkhand, Madhya Pradesh, Rajasthan, Telangana and Uttar Pradesh.

It may be pointed out that the sample size of the survey comprises of 36479 rural households and 29447 urban households spread over different states/union territories. It has been indicated in the survey report that some estimates for the smaller states/UTs in the state tables may be subject to high sampling fluctuations as such estimates may be based on very small sample sizes.

Literacy Rates of Age group 15 years and above population

Literacy rates for adult population aged 15 years and over are available for 2004-05 (61st round), 2007-08 (64th round) and 2014 (71st round). Comparative adult literacy rates for these rounds and that of census 2011 are given in the statement below.
